

CORRIDOR SAFETY ANALYSIS North Central Region

Participate In Our Survey

North Central Region Posts Survey as part of Corridor Safety Analysis

The Rural Planning Organization (RPO) for the North Central Regional Planning & Development Commission has begun a Corridor Safety Analysis of the region's priority roadway system.

As the first step of the study, North Central is asking local residents to voice their safety concerns by taking a survey either online or on paper. Residents that live within the six-county region can provide comments until April 29, 2011 relating to safety on the Corridor Safety Analysis Website (see link below) or through paper copies. For more details on the project or how to get a paper copy of the survey, please call 814-773-3162. To view the online survey please visit the following website and click the link provided:

<http://www.ncentral.com>

Be sure to periodically check the website for survey results and updated project information.

Online Survey - As easy as 1, 2, 3

1. Click on "Report" to identify a location. Provide the address manually OR click "Next" to identify a location using the map. Using the map, click on the red marker and drag it to the location of concern (if you aren't sure, add more detail in the space provided). For more or less detail, zoom in or out on the map.
2. Click on the pull down menu under "Category" and select one of the options. If you select Safety Concerns*, a checklist is provided for you to note your specific concern. You may check as many concerns that apply and provide a brief description. (Please include a photo if possible.)
3. Hit "Submit" and your safety concern will be documented and instantly emailed to us.

Please feel free to report multiple concerns by repeating steps 1-3. Thank you for your help.

We will then use your feedback in the safety analysis. Stay tuned to the website for a summary of your concerns.

* Additional Information: Transit or Bus Stop – safety concern about locations or access to transit stops. Left turn stacking traffic – waiting extended periods for left turns blocking traffic.

CORRIDOR SAFETY ANALYSIS

North Central Region

Public Survey

No one knows the region's Core Transportation System better than those that use it every day. The first step in the Corridor Safety Analysis is for you to help us identify any locations in the region that are safety concerns. To report an area of concern, please fill out the survey below. If you have more than one location that is a safety concern, please copy this page and repeat the process.

Location of Concern

Street Address: _____

City: _____ State: _____

Category of Concern

- Safety Concerns
- Additional Transportation Concerns
- Other: _____

Please indicate the primary reason(s) for your roadway safety concern at this location?

- | | |
|--|---|
| <input type="checkbox"/> Transit or Bus Stop | <input type="checkbox"/> Objects too Close to Road |
| <input type="checkbox"/> Agressive Driving | <input type="checkbox"/> Poor Drainage |
| <input type="checkbox"/> Excessive Speeds | <input checked="" type="checkbox"/> Poor Sight Distance |
| <input type="checkbox"/> Left Turn Stacking Traffic | <input type="checkbox"/> Poor Signing |
| <input checked="" type="checkbox"/> Limited Area for Bicyclists | <input type="checkbox"/> Poor Visibility of Lane Markings |
| <input checked="" type="checkbox"/> Limited Area for Pedestrians | <input checked="" type="checkbox"/> Sharp Curves |
| <input type="checkbox"/> Multiple Access Points | <input type="checkbox"/> Traffic Congestion |
| <input checked="" type="checkbox"/> Narrow Roadway | |

Description

Your Name (optional): _____

Your Address (optional): _____
